delirium and sleep management; infection; wound healing, and nutrition. Tables and illustrations throughout add clarity to the content being covered.

Populations coverage prepares you to meet the needs of unique trauma patient populations including pregnant women, children, the elderly, bariatric individuals, burned patients, those with a history of substance abuse and organ donors. With timely discussions on emerging topics such as mass casualty events and rural trauma, this is the most comprehensive text to prepare you for any patient scenario.

This book provides coverage from preventive care and the time of injury to the resuscitative, operative, critical, intermediate, and rehabilitative stages. Plus, new chapters address trauma care for pregnant women, children, and the elderly. A dedicated chapter on bariatric trauma care is also included.

The second edition of Trauma Nursing: From Resuscitation Through Rehabilitation, 5th Edition features coverage of cutting-edge research and updates throughout the text. The book is written based on the latest updates from the Federal Aviation Association and the National Transportation Safety Board. Meets the needs of all healthcare providers dedicated to expert care delivery in transport, including paramedics, physicians, respiratory therapists, and nurses.

The section on pre-hospital care presents a key component of the trauma care spectrum, rather than focusing solely on the nurse's role in in-hospital care. Multidisciplinary approach makes the book relevant for all trauma care providers.

The organization and format facilitate learning, enables information to be found quickly, and makes the book more user-friendly. The section on pre-hospital care presents a key component of the trauma care spectrum, rather than focusing solely on the nurse's role in in-hospital care. Multidisciplinary approach makes the book relevant for all trauma care providers.

Research evidence is used throughout to support the text, laying the foundation for expert nursing practice. About 2000 references are included, many of which are peer reviewed.

Multidisciplinary approach makes the book relevant for all trauma care providers. About 2000 references are included, many of which are peer reviewed.

Some of the highlights of the second edition include:

- NEW! Focus on interprofessional and collaborative nature of transport, emphasizing the importance of teamwork in ensuring safe and efficient care.
- NEW! Real-life scenarios with updated technology demonstrate how to apply concepts to scenarios similar to those you'll encounter in practice.
- About 2000 references are included, many of which are peer reviewed.
- Highlighted skills - cross references to the Clinical Skills chapter throughout text
- Over 30 new case studies
- Patient journey from pre-hospital to hospital to home
- Meets the needs of all healthcare providers dedicated to expert care delivery in transport, including paramedics, physicians, respiratory therapists, and nurses.

The book has also been updated to include:

- A dedicated chapter on bariatric trauma care
- New chapters on trauma care for pregnant women, children, and the elderly
- Coverage of mass casualty events and rural trauma
- Expanded content on bariatrics
- Updates to chapters including Scene Operations and Safety, Neurologic Trauma, and Shock
