Sidi lives a humble life on a farm, tending to his beloved "girls" on the outskirts of the desolate North African village of Nawa. He wakes one morning to find that something has attacked one of his beehives, brutally killing every inhabitant. Heartbroken, he soon learns that a mysterious hornets swarm has terrorized the mass murder—bear how did they come from, and how can he stop them? If he is going to unravel this mystery and save his bees from annihilation, Sidi must venture out into the village and then brave the big city and beyond in search of answers. Along the way, he discovers a country and a people turned upside down by their new post-Arab Spring reality as Islamic fundamentalists seek to influence votes at any cost on the eve of their first democratic elections. To succeed in his quest, and find a glimmer of hope to protect all that he holds dear, Sidi will have to look further than he ever imagined. In this brilliantly accessible modern-day parable, Yamen Manai uses a masterful blend of humor and drama to reveal what happens in a country shaken by revolutionary change after the world stops watching.Scots like Iain N. Banks and Ken MacLeod lead in a futuristic tradition, for From MacDonald, Barrie, and Stevenson onwards, Scots have been speculating in ways derived from their unique circumstances lacking political power, they imagine future spaces and different times and 151with a 19th-century thermodynamics (theorized in Science Fiction), Celtic Otherworlds, and a Scotland always on the other side of history open unusual futures for Mitchinson, Spark, Lindsay, Mitchell, MadDiamrd, Morgan, Crumey, Fitt, and Gray.Science fiction is a literary genre based on scientific speculation. Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings. Science Fiction and Science Fiction examines in one volume how science has propelled science-fiction and, to a lesser extent, how science fiction has influenced the sciences. Although the coverage concentrates on the 19th century to the present, when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science-fiction works speculating on the future. As scientific developments alter the future, the literature absorbs, uses, and adapts such contextual visions. The goal of the Encyclopedia is not to present a catalog of sciences and their application on the market. However, today’s science fiction is a combination of science fact and science fiction, and it is a significant part of the literature of the future. The Encyclopedia of Literature and Science is a user-friendly reference for English-language readers who are eager to explore contemporary fiction from around the world. Profiling hundreds of titles and authors from American narco-fiction and award-winning French novels. The book’s critical selection of titles defines the arc of a country’s literary development. Entries illuminate the fiction of individual nations, cultures, and peoples, while concise biographies sketch the careers of noteworthy authors. Compiled by M. A. Orthofer, an avid book reviewer and the founder of the literary review site Complete Review, this reference is perfect for readers who wish to expand their reading choices and knowledge of contemporary world fiction. “A bird’s-eye view of titles and authors from everywhere—a book overfull with reminders of why we love to read international fiction. Keep it close by.”—Robert Con Davis—biographies sketch the careers of noteworthy authors. Compiled by M. A. always contested border between purity and adulteration, and as, at the end of the nineteenth century, the very notion of a pure food changed. In the end, there is (and was) no natural, prehuman distinction between pure and adulterated food.

In the United States, in the latter nineteenth century, extraordinary changes in food and agriculture gave rise to new tensions in the ways people understood, obtained, trusted, and ate their food. This was the Era of Adulteration, and its

Benjamin R. Cohen uses the pure food crusades at the turn of the twentieth century to provide a captivating window onto the origins of manufactured foods in

TMOD as one of four examples in its “Guide to Writing Speculative Poetry.” Peter Payack is the First Poet Populist of Cambridge, Massachusetts. Quotes about Payack’s poems: “To read Payack is to embark upon a philosophical wild ride designed to shake loose all your assumptions and open your eyes to new ways of seeing the world.”—The Boston Phoenix “Payack’s intellectual curiosity has led him over the years to learn and read about ancient philosophy and religion, the Bible, Dante, and the cosmic interplay of science and religion. He incorporates in his work the knowledge he has acquired in his years of reading widely through
”.—Mike Benedikt (Poetry Editor of the Paris Review)“Peter Payack is an ingenious bard with a seemingly endless supply of ideas.”—The Christian Science Monitor A collection of short stories by writers from around the world. This reference defines the rapidly emerging interdisciplinary field of literature and science. An introductory essay traces the history of the field, its growing reputation, and the current state of research.

Broad in scope, the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies. This volume includes over 650 A-Z entries on: topics and themes, significant writers and scientists, key works, and important theories and methodologies. A spectacular new collection of translated poetry by one of the most exciting and distinctive poets currently writing. One man’s struggle to maintain his dignity as a man in a Russian concentration camp. Translated by Ralph Parker. Introduction by Marvin L. Kalb. Foreword by Alexander Tvarдовский. Orphaned as a teen, Carol Milford grew up in a city in Minnesota. Already a compassionate person, Carol’s time studying in college and grad school exposed her to diverse, radical ideas and lifestyles, which she learned to either accept or tolerate. After college, Carol earns a position as a librarian in the state capital city, yet finds the work to be unsatisfying. This is why she agrees when her new husband, a doctor named Will, asks if they can move to his small hometown in rural Iowa, a town not far from where she grew up.

Soon after Will and Carol arrive in the rural town, Carol finds herself immensely disappointed in the scenery and culture. The architecture of the town is ugly and bland, and is decorated to match. Meanwhile, its occupants hold a high level of snooty conservatism, and immediately disapprove of Carol for being a working woman. Because Carol loves her husband and loves to help, she becomes determined to lead a reform for the town by cleaning up the streets and educating the people. However, Carol attempts to start progressive clubs and tries to make friends, but every idea she has is disregarded and disrespected by the townspeople. She is adopted by a group of people, dedicated to keeping the town an unchanging, unprogressive, un Karnandanti, a cult devoted to suppressing the powerful and destructive Moon Goddess. But everything is about to change as Sweeney learns that her new best friends are the Goddess’s Chosen Ones. Rich and engrossing, Waking the TMOD as one of four examples in its “Guide to Writing Speculative Poetry” Peter Payack is the First Poet Populist of Cambridge, Massachusetts. central to daily decisions about the foods we eat, how we produce them, and what choices we make when buying them. The story of unmanned space exploration, from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds. Spanning four decades of dramatic advances in astronomy and planetary science, this book tells the story of eleven iconic exploratory missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it. The journey begins with the Viking and Mars Exploration Rover missions to Mars, which paint a startling picture of a planet at the cusp of habitability. It then moves into the realm of the gas giants with the Voyager probes and Cassini's ongoing exploration of the moons of Saturn. The Stardust probe's dramatic round-trip encounter with a comet is brought vividly to life, as are the SOHO and Hipparcos missions to study the Sun and Milky Way. This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA's great observatories—Spitzer, Chandra, and Hubble—and how the WMAP mission has provided rare glimpses of the dawn of creation. Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos.

This book is the result of a visit to China by a group of researchers. The authors report on their impressions of welfare, education and the cultural tradition in the Chinese nursery school. They report on the new family policy, the changing family pattern and on the methods used in children's health care and their results.

A poet of the twenty-first century looks back on the artificial metamorphosis of Mars into a habitable planet. A work of unparalleled candor and splendid beauty, The Lyrics celebrates the creative life and the musical genius of Paul McCartney through 154 of his most meaningful songs. From his early Liverpool days, through the historic decade of The Beatles, to Wings and his long solo career, The Lyrics pairs the definitive texts of 154 Paul McCartney songs with first-person commentaries on his life and music. Spanning two alphabetically arranged volumes, these commentaries reveal how the songs came to be and the people who inspired them: his devoted parents, Mary and Jim; his songwriting partner, John Lennon; his “Golden Earth Girl,” Linda Eastman; his wife, Nancy McCartney; and even Queen Elizabeth, among many others. Here are the origins of “Let It Be,” “Lovely Rita,” “Yesterday,” and “Mull of Kintyre,” as well as McCartney’s literary influences, including Shakespeare, Lewis Carroll, and Alan Durband, his high-school English teacher. With images from McCartney’s personal archives—handwritten texts, paintings, and photographs, hundreds previously unseen—The Lyrics, spanning sixty-four years, becomes the definitive literary and visual record of one of the greatest songwriters of all time.

Home to generations of humans, the starship Argonos has wandered aimlessly throughout the galaxy for hundreds of years, desperately searching for other signs of life. Now, a steady, unidentified transmission lures them toward a nearby planet, where the grisly remains of a former colony await the crew. Haunted by what they have seen, the crew has no choice but to follow when another signal beckons the Argonos into deep space—and into the dark heart of an alien mystery. “[Russo] is not afraid to take on the question of evil in a divinely ordered universe. This is an ambitious novel of ideas that generates considerable suspense while respecting its sources, its characters, and most important, the reader.”—The New York Times “A tale of high adventure and personal drama in the far future.”—Library Journal “Relentlessly suspenseful. Full of mystery every exciting.” —Science Fiction Chronicle
