Graduates from the Morrison College Class of 1967 don't seem to have read the rulebook - the one that replaces romance with less youthful infatuations. Sure, they love to garden, adore their kids and grandkids, read, knit, and deplore texting, and yes, the television volume occasionally approaches rock concert level, but nothing - I repeat nothing - has replaced romance or passion. As love's illusions are sampled and digested, Liv's decades old secret, Rich's relationship with his ex-wife, and Scotty's adventures with fame, fortune, and the wicked witch of the west, are ingredients for a perfect tale of lust and love. Reunion organizer Guen remains caught between two generations as she struggles to have a life of her own, and Mary Alice manages full-time child care and stolen moments with her man with a droll sense of humor. In LOVE'S ILLUSIONS, volume two of the series Life, Love, and Bifocals, the bifocal set once again declares that the mirror is not the judge of who they are. Now if they can just figure out what is...

The Relationship Between Bifocal Eyeglass Use and Risk Factors for Falling

There are problems with the compatibility of spectacles and certain helmet mounted electro-optical visual display systems. The incompatibility has been partially resolved with single vision contact lenses. However, these contact lenses have not helped senior aviators, who must wear bifocal glasses due to their presbyopia. The purpose of this study was to compare the performance of bifocal soft contact lenses with that of bifocal spectacle lenses to determine if contact lenses are an option for helping older aviators meet the visual requirements needed to fly military aircraft. Seventeen volunteer presbyopic aviators from Fort Rucker were fitted with five bifocal soft contact lens combinations and bifocal glasses. A four-phase investigation was conducted: a clinical phase involving the fitting of the bifocal contact lenses; a laboratory phase involving measurements of visual functions; a simulator phase involving measures of visual performance in simulated flight conditions; and an operational phase consisting of subjective responses regarding in-flight use of bifocal contact lenses. In general, vision in the best performing bifocal contact lenses typically was slightly reduced from vision in bifocal spectacles. The amount of the reduction, and whether it was clinically significant, depended on the refractive error of the subject (myopes generally performed better), the add group of the subject (low add group subjects performed better), and the type of bifocal contact lens. Aviators performed flight simulation maneuvers better in bifocal contact lenses than in bifocal glasses, and they evaluated their own ease of vision while performing aviation duties to be much easier in bifocal contact lenses than in bifocal glasses. In actual flight operations, each aviator preferred bifocal contact lenses over bifocal spectacles. Bifocal soft contact lenses are an acceptable

College reunions present a pageantry of who has found fortune, fallen far, remained buff, aged poorly, married well, or divorced often. For Olivia Walker MacLearn (Liv) the stakes are higher because forty-six years before the internet spit out her contact information onto reunion organizer Guen’s laptop, Liv had cut all ties with her friends from Kentucky’s prestigious Morrison College. Not so much as an exchange of Christmas cards has tied her to her past. But when an invitation to a 46th reunion arrives, Liv is strangely drawn to the place she fled, even though she knows that an explanation of why she went off-radar could reveal a secret long kept. Then an email arrives from Rich, the man who broke her heart those decades ago at Morrison, to her past. But when an invitation to a 46th reunion arrives, Liv is strangely drawn to the place she fled, even though she knows that an explanation of

After relentlessly studying the teachings of legendary healers, such as Dr Arnold Ehret and Dr Robert Morse, we set out on a journey of healing ourselves and reversing our very own conditions. Within our group, we were suffering from a range of diverse diseases and conditions, including Heart Disease, Kidney Disease, Diabetes, a variety of Autoimmune Diseases and Leaky Gut. During our healing journeys, we formed a journal that we would use on a daily basis, and this helped us to incorporate all of the lessons and tips that we had learnt and refined along the way - in short, it acted as a check list. It was important to us to not miss out on any knowledge and practices that had served us well. This journal is designed to guide and support you through your own journey with the core healing protocols included within its theme. One of the key conclusions that we reached through our individual journeys was that whether you are a sufferer of Chorioretinal Atrophy Progressive Bifocal, or any other condition, the same protocol that we used applies. However, dependent on the severity of your Chorioretinal Atrophy Progressive Bifocal, you may need to follow the protocols for longer, using specific herbs in order to achieve positive results, but you can make your own adjustments as you learn more. The great news is that all information and resources are readily available for personal study and application. Dr Arnold Ehret's books can be downloaded freely if you search for "arnold ehret books pdf". Visit rawflips.com for Dr Robert Morse videos which can be searched through by keywords via the search bar. With this journal and your newly acquired knowledge, we trust that you will also soon start to experience the positive results that we did, along with the many others that send us regular positive feedback. We wish you all the best. The Health Formation Team

Relying on an edition of Novalis’ notebooks which includes much of the author’s scientific and philosophical musings, Neubauer’s study evaluates Novalis’ outline for a creative science and philosophical background of the eighteenth century. Concentrating on his study of physiology and medicine, this work illuminates Novalis’ changing perspectives on the relationship between the imagination and the material world, and whether a synthesis between the two is possible.
