Vellus hair - Wikipedia

Rituximab - Medical Clinical Policy Bulletins | Aetna

Mar 16, 2017 · Alopecia areata (AA) is a common type of hair loss or alopecia in humans; it is an autoimmune disease with a variable, typically relapsing or remitting, course that can be persistent – especially when hair loss is extensive. Alopecia areata is the second-most frequent non-scarring alopecia, after male and female pattern alopecia …

Alopecia areata - PubMed Central (PMC)

Signs and symptoms Related conditions. Razor burn is a less serious condition caused by shaving, characterized by mild to moderate redness and irritation on the surface …

Pseudofolliculitis barbae - Wikipedia

Vellus hair is short, thin, light-colored, and barely noticeable hair that develops on most of a person's body during childhood. Exceptions include the lips, the back of the ear, the …
