One follow-up article to Case Study No.4 is also included in the volume. The OS's Section on Case Studies in Data Analysis was initiated by a former editor who wanted to increase the analytical content of the journal. We were asked to become Section Co-Editors and to develop a format for the case studies. Each case study presents analyses of a real data set by two or more analysts or teams of analysts working independently in a simulated consulting context. The section aimed at demonstrating the process of statistical analysis and the possible diversity of approaches and conclusions. For each case study, the Co-Editors found a set of real Canadian data, posed what they thought was an interesting statistical problem, and recruited analysts working in Canada who were willing to tackle it. The published case studies describe the data and the problem, and present and discuss the analysts' solutions. For some case studies, the providers of the data were invited to contribute their own analysis.The fast and easy way to score your best on the Firefighter Exam In addition to physical tests of strength, agility, and coordination, firefighters must also pass a difficult written test that requires serious preparation to fare well, and many applicants fail to succeed. Innovative and challenging, Joy Schaverien offers a psychological analysis of the long-established British and colonial preparatory and public boarding school tradition. Richly illustrated with pictures and the narratives of adult ex-boarders in psychotherapy, the book demonstrates how some forms of enduring distress in adult life may be traced back to the early losses of home and family. Developed from clinical research and informed by attachment and child development theories 'Boarding School Syndrome' is a new term that offers a theoretical framework on which the psychotherapeutic treatment of ex-boarders may build. Divided into four parts, History: In the Name of Privilege; Exile and Healing; Broken Attachments: A Hidden Trauma, and The Boarding School Body, the book includes vivid case studies of ex-boarders in psychotherapy. Their accounts reveal details of the suffering endured: loss, bereavement and captivity are sometimes compounded by physical, sexual and psychological abuse. Here, Joy Schaverien shows how many boarders adopt unconscious coping strategies including dissociative amnesia resulting in a psychological split between the 'home self' and the 'boarding school self'. This pattern may continue into adult life, causing difficulties in intimate relationships, generalized depression and separation anxiety amongst other forms of psychological distress. Boarding School Syndrome demonstrates how boarding school may damage those it is meant to be a reward and discusses the wider implications of this tradition. It will be essential reading for psychoanalysts, Jungian analysts, psychotherapists, art psychotherapists, counsellors and others interested in the psychological, cultural and international legacy of this tradition including ex-boarders and their partners.Test-preparation guide helps individuals achieve top exam scores to qualify for a career as a firefighter.
