The word “science” carries a suggestion sufficient to render a book so labeled taboo to the average reader. But here is a book of genuine science which the most timid may read with delight; for perhaps Fabre never shows his greatness more than through the simplicity of his diction. In this work he imparts great facts about things which are familiar to the sight, but not to the understanding, of most of us. Light, sound, electricity, the locomotive, extinct volcanoes, condensation and evaporation, prehistoric animals, grafting and the sea — these and many other subjects are dealt with in a simple narrative style as thrilling as the most exciting novel, only with this difference: how infinitely richer we are when we turn the last page of this book, and how infinitely more the world means to us. Fabre opens our eyes.

Hello, You! So . . . this book is full of stuff I've always wondered about . . . Like: Did Miss Mary Mack have friends who liked other colors? Could everything important about the world be summarized in a poem that rhymes? How do Moms always know when you're about to sneak a cookie? Who hid something under the Tooth Fairy's pillow when she was a little girl? Inside you will find stories, short poems, lists, palindromes, visual treats, and random observations. Some parts are happy, some sad-ish, some silly, some serious, some crunchy, some with a soft center. You can open the book up anywhere and read. So the beginning could be the end, and the end could be the beginning. But I guess the middle is always the middle. . . . P.S. aren't Paul's drawings the best?!

Fresh and never-before published talks on the crux of Buddhist practice and how to uncover wonder in your daily life from legendary Zen teacher and bestselling author Charlotte Joko Beck. “As you embrace the suffering of life, the wonder shows up at the same time. They go together.”—Charlotte Joko Beck In this collection of never-before published teachings by Charlotte Joko Beck, one of the most influential Western-born Zen teachers, she explores our “core beliefs”—the hidden, negative convictions we hold about ourselves that direct our thoughts and behavior and prevent us from experiencing life as it is. Wryly humorous and relatable, Beck uses powerfully clear language to show how our lives present us with daily opportunities to move from thinking to experiencing, from compulsivity to confidence, and from anguish to peace. Whether you are a Zen practitioner or a reader interested in exploring these teachings for the first time, Ordinary Wonder offers the depth and breadth of Beck's remarkable experience in an accessible guide to practice amidst the struggles of daily life.

The Wonder Book of Trains

In this masterpiece by Emma Donoghue, bestselling author of Room, an English nurse is brought to a small Irish village to observe what appears to be a miracle -- a girl said to have survived without food for month -- and soon finds herself fighting to save the child's life. Tourists flock to the cabin of eleven-year-old Anna O'Donnell, who believes herself to be living off manna from heaven, and a journalist is sent to cover the sensation. Lib Wright, a veteran of Florence Nightingale's Crimean campaign, is hired to keep watch over the girl. Written with all the propulsive tension that made Room a huge bestseller, The Wonder works beautifully on many levels -- a tale of two strangers who transform each other's lives, a powerful psychological thriller, and a story of love pitted against evil. Acclaim for The Wonder:

"Deliciously gothic. Dark and vivid, with complicated characters, this is a novel that lodges itself deep" (USA Today, 3/4 stars) "Heartbreaking and transcendent" (New York Times) "A fable as lean and discomfiting as Anna's dwindling body. Donoghue keeps us riveted" (Chicago Tribune) "Donoghue poses powerful questions about faith and belief" (Newsday)

The Wonder of Wildflowers

From the author of the worldwide bestseller Room: “Her greatest achievement yetEmma Donoghue shows more than range with Frog Music—she shows genius.”—Darin Strauss, author of Half a Life.

Summer of 1876: San Francisco is in the fierce grip of a record-breaking heat wave and a smallpox epidemic. Through the window of a railroad saloon, a young woman named Jenny Bonnet is shot dead. The survivor, her friend Blanche Beunon, is a French burlesque dancer. Over the next three days, she will risk everything to bring Jenny’s murderer to justice—if he doesn’t track her down first. The story Blanche struggles to piece together is one of free-love bohemians, desperate paupers, and arrogant millionaires; of jealous men, icy women, and damaged children. It’s the secret life of Jenny herself, a notorious character who breaks the law every morning by getting dressed: a charmer as slippery as the frogs she hunts. In thrilling, cinematic style, Frog Music digs up a long-forgotten, never-solved crime. Full of songs that migrated across the world, Emma Donoghue’s lyrical tale of love and bloodshed among lowlifes captures the pulse of a boomtown like no other.

The Books of Wonder

A fascinating investigation into the miraculous world of birds and the powerful—and surprising—ways they enrich our lives and sustain the planet Our relationship to birds is different from our relationship to any other wild creatures. They are found virtually everywhere and we love to watch them, listen to them, Page 8/11
The Wonder of Birds

Jim Robbins

Birds, Jim Robbins posits, are our most vital connection to nature. They compel us to look to the skies, both literally and metaphorically; draw us out into nature to seek their beauty; and let us experience vicariously what it is like to be weightless. Birds have helped us in so many of our human endeavors: learning to fly, providing clothing and food, and helping us better understand the human brain and body. And they even have much to teach us about being human in the natural world. This book illuminates qualities unique to birds that demonstrate just how invaluable they are to humankind—both ecologically and spiritually. The wings of turkey buzzards influenced the Wright brothers' flight design; the chickadee's song is considered by scientists to be the most sophisticated language in the animal world and a "window into the evolution of our own language and our society"; and the quietly powerful presence of eagles in the disadvantaged neighborhood of Anacostia, in Washington, D.C., proved to be an effective method for rehabilitating the troubled young people placed in charge of their care. Exploring both cutting-edge scientific research and our oldest cultural beliefs, Robbins moves these astonishing creatures from the background of our lives to the foreground, from the quotidian to the miraculous, showing us that we must fight to save imperiled bird populations and the places they live, for the sake of both the planet and humankind.
